

Magistrate

BRAND + PRODUCT SYSTEM

Identity, mobile interaction, voice behavior, implementation tokens, and asset handoff

Calm at rest. Spectral when alive.

The clearest rule in the system: activity earns color; ordinary use remains quiet.

DORMANT

Monochrome

Trusted, neutral, restrained

LISTENING

Functional spectrum

Cyan awakens at the microphone

EXECUTING

Functional spectrum

Cyan + blue-violet show work

IMMERSIVE

Full spectrum

Organic expression for major AI moments

90-95% NEUTRAL DURING ORDINARY USE

Do not spread spectral styling through navigation, cards, buttons, labels, or decorative surfaces. Color must answer one question: what is Magistrate doing now?

SPECTRUM IS SIGNAL

- Listening
- Thinking
- Speaking / executing

Magistrate

CLEAN OPERATIONAL MARK

One command field. One responsive center.
A single triangle holds the system together at every scale.

BEHAVIOR

Dormant

Quiet, monochrome

Listening

Spectrum awakens

Executing

Focused spectral flow

MAGISTRATE / ACTIVE VOICE STATE

Two levels of activation.

Neutral foundations remain dominant. Functional color is restrained; full spectrum is exceptional.

LEVEL 1 — FUNCTIONAL ACTIVE COLOR

Cyan + blue-violet

Active microphone · listening · thinking · focus ·
selected model or intelligence state

LEVEL 2 — FULL SPECTRAL MAGISTRATE

Green → cyan → violet → magenta

Immersive voice · organic active mark · significant
activation · launch and hero imagery

SEMANTIC COLOR REMAINS SEMANTIC

 **SUCCESS / HEALTHY**

Never substitute spectral
energy for clear status
meaning.

 **WARNING / WAITING**

Never substitute spectral
energy for clear status
meaning.

 **DESTRUCTIVE / FAILURE**

Never substitute spectral
energy for clear status
meaning.

 **SELECTION**

Never substitute spectral
energy for clear status
meaning.

Atmosphere behind glass.

Automatic, built-in, and custom backgrounds share one adaptive readability layer.

Clear

Cloudy

Rain

Storm

Sunset

Night

Minimal dark

Glass surface: subtle transparency + 22px blur + theme-aware dimming. Custom images must persist durably.

Conversation is the center of gravity.

Modern AI chat simplicity with Firstmate and fleet control kept underneath.

FIRSTMATE / CONVERSATIONAL VOICE

OPERATIONAL DRAWER

AGENT CONVERSATION

LIGHT / EQUAL HIERARCHY

Fleet present. Human judgment protected.

Attention, fleet, activity, and authenticated services stay reachable without becoming a dashboard.

ATTENTION

Only awareness or judgment

Firstmate needs approval
Deploy authentication changes to staging.

Approve Reject Dismiss

No fake toggles. No raw tool noise.

FLEET SUMMARY

Expandable and subordinate

Firstmate	Active
fm-auth	Active
fm-api	Idle
fm-ui	Waiting

Select an agent to open its real conversation.

No fake toggles. No raw tool noise.

CONNECTIONS

Real authenticated services

GitHub	Connected
Jira	Connected
Microsoft Teams	Authorization required

Connect · Reconnect · Disconnect · Health

No fake toggles. No raw tool noise.

RECENT ACTIVITY

Meaningful outcomes only: PR opened · worker completed · tests passed · task dispatched · decision approved

Calm surface. Private execution.

Aligned to the Magi Bible control-plane and runner structure.

Two voice experiences. One continuous thread.

Conversational voice is default. Immersive call mode is optional and returns to the exact prior state.

A — CONVERSATIONAL VOICE / DEFAULT

The interface stays visible.

Conversation history, live transcription, Firstmate responses, composer, current agent, and voice state remain on screen.

ENTRY

Voice Call · Siri · Action Button · explicit expansion

CONTINUITY

Barge-in and auto-listen supported. Restart preserves the visible thread.

IMMERSIVE UI

Organic mark, live waveform, minimal controls, End Conversation

B — IMMERSIVE VOICE / CALL MODE

Optional full expression.

Waveform · End Conversation

One hierarchy across every medium.

Current product behavior, mobile stability, and future interfaces share the same control model.

CHAT

Prose-first conversation
Action cards only when necessary
Jump-to-latest + realtime messages

FLEET

Firstmate remains primary
Agent chats reuse the same shell
Status and unread remain visible

VOICE

Conversational mode by default
Optional immersive call mode
Live transcript + continuous loop

MOBILE

Safe-area and keyboard stable
No zoom or horizontal overflow
One-handed drawer / sheet behavior

INVARIANT HIERARCHY

HUMAN ↓ MAGISTRATE ↓ FIRSTMATE / CONNECTED SYSTEMS

The same hierarchy must survive iPhone, desktop, AR glasses, voice-only, headset, and wearable contexts. Do not bind the identity to phone rectangles.

Brand system locked for validation.

This package is the canonical visual source for wireframes, prototypes, usability tests, and implementation.

UNCHANGED

Name + wordmark
Triangle + centered spiral
Bodoni Moda / Inter
Light + dark environments
Atmospheric glass
App icons + core tokens

REFINED

Two voice modes
Two spectral levels
Chat-centered application
Attention + fleet hierarchy
Authenticated Connections
Mobile-first stability

IMPLEMENTATION

Use editable SVG boards
Use JSON / CSS tokens
Honor reduced motion
Preserve semantic colors
Keep internal traces hidden
Test both environments

NEXT PRODUCT PHASE

Wireframes → Interaction prototypes → Usability tests → Final implementation
